

Curriculum Guide, 11th Grade History

This curriculum guide is designed to be used with the text, American Odyssey *The 20th Century and Beyond*, by Gary Nash.

United States History and Geography: Continuity and Change in the Twentieth Century

When planning the scope and sequence for 11th grade Social Science/History, the following are the California Curriculum Standards that apply in public schools. In this guide, the standards are linked to certain chapters in the text, American Odyssey. This text is written and arranged in such a way as to closely follow the standards. However, other independent sources, when used in conjunction with the text, will greatly enhance the study of the historical periods and events covered in the standards.

How to use this guide:

- **The standards are listed sequentially below, from Standard 11.1 to Standard 11.11.**
- **The first entry of each standard describes that standard in general terms.**
- **That general description is followed by an explanation of the chapters and pages in American Odyssey where the standard is covered.**
- **Next, there is an estimate of the number of days or weeks suggested to cover the text chapters that address the standard.**
- **For some standards, there are supplemental materials suggested that are available at the Tulare County Office of Education Educational Resource Services (ERS) office.**
- **Finally, each section has a list of items that outline the specific areas of emphasis suggested for each standard. These may guide the student's reading, discussion, writing, viewing of videos and other recorded materials, and other investigations (including field trips, visits to museums, cultural events, etc.) in order to fully explore the standard.**

Students in grade eleven study the major turning points in American history in the twentieth century. Following a review of the nation's beginnings and the impact of the Enlightenment on U.S. democratic ideals, students build upon the tenth grade study of global industrialization to understand the emergence and impact of new technology and a corporate economy, including the social and cultural effects. They trace the change in the ethnic composition of American society; the movement toward equal rights for racial minorities and women; and the role of the United States as a major world power. An emphasis is placed on the expanding role of the federal government and federal courts as well as the continuing tension between the individual and the state. Students consider the major social problems of our time and trace their causes in historical events. They learn that the United States has served as a model for other nations and that the rights and

freedoms we enjoy are not accidents, but the results of a defined set of political principles that are not always basic to citizens of other countries. Students understand that our rights under the U.S. Constitution are a precious inheritance that depends on an educated citizenry for their preservation and protection.
